

# Sandhurst Industrial Share Fund

Quarterly fund update - December 2025

## Investment approach

The Fund aims to deliver income and capital growth over the long term by investing in a diversified portfolio of quality ASX listed industrial shares (excluding resource shares) where these assets are identified by Investors Mutual Limited (IML) as being undervalued.

Recommended investment timeframe	5 years +
Risk level	High

## Unit price (ex distribution)

as at 31 December 2025

Application price	\$1.69193
Withdrawal price	\$1.68349

## Distribution details (cents per unit)

30 June 2025	\$0.01421
31 December 2025	\$0.05266

## Make the most of your investment

### ► The power of compounding

Compounding can be a powerful tool in wealth creation. Reinvesting distributions can be one of the easiest and cheapest ways to increase your holdings over time. You're compounding your investment's growth by continually adding more units which, in turn, will generate distributions of their own.

Why not reinvest your half yearly distributions?

### ► The benefits of making it regular

Making regular contributions to your investment can both grow your investment and smooth the effects of market highs and lows.

Why not add a Regular Savings Plan to your investment? Establish one from as little as \$50 per month.

You can also use BPAY® to add to your investment at any time with as little as \$100.

See your statement for your BPAY reference number.

® Registered to BPAY Pty Ltd ABN 69 079 137 518

## Fund Performance<sup>5</sup>

The Fund had a resilient quarter, down -1.8%, ahead of the benchmark's drop of -4.4%.

Global equity markets performed well again in the September quarter with the MSCI World up +3.7% and all major markets delivering positive returns except for the ASX 300. The Nasdaq rose a modest +2.7%, as investors grew nervous of the high valuations of AI-related stocks, while the Nikkei soared +12.2% as investors became increasingly confident in the prospects for Japanese companies after Japan's trade deal with the US.

The ASX 300 lagged its global peers, falling -0.9%, for the quarter as investors grew concerned about possible rate rises after higher-than-expected inflation numbers. The Fund's Industrials benchmark fell further, -4.4%, as it missed out on the stellar performance of resources stocks during the quarter. Technology was the worst performing sector in the benchmark, dropping -23.7% as concerns around highly valued tech companies spread from the US. All other sectors also fell except Industrials, which eked out a small gain of +0.6%.

Many of the Fund's holdings performed well for the quarter including Orica +16.5%, Light & Wonder +21.5%, Dalrymple Bay Infrastructure +16.2%, and Aurizon +14.4%. However, Resmed and CSL were disappointing, falling -12.2% and -12.9% respectively, falling along with the Health Care sector. IML remain convinced of their longer-term prospects.

## Outlook<sup>5</sup>

The outlook for the global economy remains uncertain with US tariffs, China's property weakness, and inflation pressuring lower income consumers. In financial markets, concerns are growing about AI-related stock valuations and bond yields are reflecting the emerging upside risks to inflation.

Most leading indicators continue to point to economic sluggishness in many parts of the world. In Australia, bullishness around housing-led growth has been impacted by the possibility of cash rate rises, a reversal of the expectations of further rate cuts. IML's focus on quality businesses with more defensive, recurring earnings positions them well for any continued volatility and any slowdown in the global and Australian economies.

Financials	-7.80%

### Footnotes

1. Fund performance figures are calculated before tax and after fees and costs; using withdrawal prices and assumes distributions are reinvested. Past performance is not an indication of future performance.
2. The benchmark for the Fund is the S&P/ASX 300 Industrial Accumulation Index.
3. Morningstar rates mutual funds from one to five stars based on how well they've performed (after adjusting for risk) in comparison to similar funds. Within each Morningstar Category, the top 10% of funds receive five stars, the next 22.5% four stars, the middle 35% three stars, the next 22.5% two stars, and the bottom 10% receive one star. Funds are rated for up to three time periods—three-, five-, and 10 years—and these ratings are combined to produce an overall rating. Funds with less than three years of history are not rated. Ratings are objective, based entirely on a mathematical evaluation of past performance. They're a useful tool for identifying funds worthy of further research, but shouldn't be considered buy or sell recommendations.

Sandhurst Industrial Share Fund received a 2-Star Overall Morningstar Rating™ out of 273 Equity Australia Large Blend funds as of 31 December 2025. The Sandhurst Industrial Share Fund returns were ranked 136 out of 257 Morningstar Equity Australia Large Blend funds for 5 years to 31 December 2025. 'Morningstar Category Rank' is the Fund's performance rank relative to all funds in the same Morningstar Category. Investments are placed into Morningstar Categories based on their compositions and portfolio statistics so that investors can make meaningful comparisons.
